"Australian Saucer Record" -- - and - Notes and Publications 6

B.S.R. Publication: "The Coming Of The Guardians". . . 7

********** ********** **********

"CLIPS, QUOTES, and COMMENTS" is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates-- 3524 Adams Avenue, San Diego 16, California.
Twelve issues (6 months) for $5.00; six issues (3 months) for $2.50; two issues for $1.00. Contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

N. Meade Layne, Director -

MIND OVER MATTER

Under the above heading, the San Diego Union of June 5, 1955, prints (in its PARADE supplement) a short description of the "cloud smashing" experiments of Dr. Rolf Alexander (M.D.), of Orillia, Ont., Canada - along with a series of four photographs showing the progressive disintegration of a small cloud formation, apparently from the effect of psychokinetic forces.

According to the Orillia dispatch, Dr. Alexander is a native of New Zealand, where he claims he "first observed the influence of mind over matter in the magic rites of the Maoris; pursued it while studying medicine and neurology at European universities, practicing Yoga in India, living in a Tibetan lamasery and elsewhere" (Alexander himself belongs to a liberal Protestant church, the Universalist).

'To demonstrate his convictions, Alexander recently invited 50 observers - including the mayor of Orillia and reporters from two newspapers - to a local park. There, as cameras clicked, he selected a target cloud 10 miles away and concentrated his mental powers on it. In 8 minutes it was gone. This, Alexander hoped, would provoke a thorough scientific study of his theories.

'To date the study has not begun. Meanwhile, for people who want to chase their own clouds, Alexander has a recipe: 1) Learn the principles of creative realism from his new book * 2) Pick a clear day when the wind is moderate and a number of small sized cumulous clouds are grouped closely enough at the same altitude to photograph them; 3) Select a target cloud, breathe deeply and "will" the cloud to shrink.

'If the technique is rightly conducted, says Alexander, the operator will feel a tightening of the abdominal muscles and a sense of tenseness behind his eyes. Warning: Be sure you are in perfect health. Wishing wears you out.

(Note; * Creative Realism; a New Method of Winning. By Rolf Alexander, M.D. Pageant Press, N.Y. $5.00).

Our belief is, the rediscovery of telekinesis (parakinesis, psychokinesis) as a basic fact in Nature is impending as a major event in human history. A 'rediscovery' because known to the ancients, as it still is to all esoteric Orders. Known also to all students of psychic and occult matters, though the nature of the 'energy' is little known and cannot usually be controlled sufficiently for experimental purposes. In writing these few words of comment, I am not unaware of the protean nature of the 'psychodynamism' of man. It is not likely, for instance, that the forces involved in telepathy, in affecting the fall of dice, or the formation of crystals under the compound microscope (Littlefield experiments), or in causing the disintegration (or reverse) of a cloud across leagues of distance, are accompanied by such ectoplasmic projections as are familiar in the seance room. Nevertheless it is probable that all of these are phenomena of etheric matter - and it is enough to say, for the moment, that the vistas of good and evil opened up by these facts are beyond our present-day imagination.

Since some half-dozen of our Associates have reported what seem to be highly favorable results from PK cloud experiments, we have printed, on the following pages, a few paragraphs from their correspondence. The range of possible experiment with such 'energies' is boundless and open to everyone. (Open to everyone, also, are the consequences of misused powers).

Correspondence of Assoc. Mary E. Coxon.

'Regarding the "cloud-smashing" article in FATE magazine, I read it last month and tried experimenting on my own. Lo and behold, I got results. I tried it first on some quite black clouds early in the evening. They took about ten minutes (I did three) to disappear. The next day was excellent for experimentation - blue sky and fluffy white clouds. I chose clouds that were off by themselves, and got the same results as before. . . Then I got the idea of trying to integrate them, starting by taking the remnant of one just dissolved and concentrating on building it up again. This also worked but was not as positive as the ones that dissolved...

My husband watched while I concentrated on two clouds that we picked out, and these disappeared; then I took the remnant of the last one and concentrated to make it bigger. It grew and finally joined a large cloud bank. My husband thought the wind might be the cause of it, but the other clouds were relatively unchanged - and wind should have affected them as well. We intend to photograph the next experiment. . . . .

(address C/o BSR Hdqrs).

Corresp. of Rev. H.A.Cronk, St.Paul,Minn.

.... I am especially interested in the experiments of Edw. S. Schultz and Dr. Alexander in dissipating clouds. Here is one in reverse. My mother (in spirit life) had me place a glass of water on the dresser. She was then able not only to take the water from it, but pushed the glass off the dresser and broke it - but there was no water on the floor. There was a faint sizzling sound as the water was being removed.

Perhaps Mr. Schultz and Dr. Alexander would like to try to evaporate a glass of water by will power or what-have-you. Then also try to produce a cloud where none was before by reversing some psychic process,such as is used by the Indians in producing rain by group ceremony.

As to personal experiments with the "cloud-busting": at my first attempt, and to my surprise, the cloud disappeared in about 12 minutes. I tried three more with a similar result. Clouds selected for such experiments should either be motionless of moving very slowly. After these attempts I noticed a numbness of the forehead and front part of the head. . . Perhaps it makes a difference whether one is standing on the ground or not.

In trying to build up a cloud, I selected a tiny one by itself, and in a few moments a long tail was added to it, which then merged with it. But I wouldn't recommend too much experimentation of this sort, as quite a strain is felt in the head - perhaps in the brains if one has them . . .

(2465 Territorial Rd.St.Paul 14

Corresp. of Assoc. J.H. Bruening

. . . I attempted also to dissolve some clouds, as per Assoc. E.S.S. & Co., and actually succeeded, needless to say much to my surprise. Of course I've no way of knowing whether the clouds would have dissolved anyway. I did have difficulty with one which was too big apparently; it went to pieces and changed shape but failed to completely dissolve. . .

(Box 3752, Univ. Sta.,Gainesville, Fla.)

WAVES OF FORM: Some of our Associates who experimented with the pyramids and cones,will recall that the skeletonized or imagined pyramid produced much the same results as one of material construction. This supplies further data as to the reality of etheric constructs, the performance of the Aurameter etc. The PK cloud effects will eventually fall into the same category as etheric phenomena, however distasteful this idea may be to physicists. I continue briefly with this same matter:

ANTONY AVENEL*
and
LEONARD G.CRAMP

"One is led to expect that before long it will be proved that there is one basic building material for the whole universe ... The theory I put forward is that ether and space are the same and that space is formed out of nothing by a grid of extremely high frequency rays. Space must be distinguished from 'nothing'. Space, even if it is empty, possesses the qualities of length, breadth, thickness, and time. 'Nothing' has no qualities, and cannot support any material or ray. Creation takes the form of making space out of 'nothing' by means of a gridwork of creative rays. . .

"Space is positive creation, while 'nothing'is the absence of space and is thus purely negative. . . Space or ether is formed by the creative rays. . . The ether can carry between the same two points any number of rays of differing frequencies... The "flying saucer" is a vehicle based on the principle of unbalancing the extension modulations of material carried in the vehicle. "

(The paragraphs quoted are from Space, Gravity and the Flying Saucer, by Leonard G. Cramp; Feb. '55. 180 pgs. British Book Center, 122 E. 55th St. N.Y. The author is here quoting about a dozen pages prepared by Mr. Avenel as a simplified statement of Mr. Avenel's "Unity of Creation Theory. These two writers, by entirely independent approach, have arrived at substantially the same basic concepts. The underscoring is by myself. m.l.)

Some of these statements should be vaguely familiar to our BSR Associates. Since the fall of 1946 they have been repeated scores of times in our publications - that SPACE equates with the ETHER - that Space is not nothingness - that 'empty space' is a meaningless expression - merely a sound we make with our mouths. That the concept of the ether (or ethers) cannot be abandoned by science, and in fact is being re - established in modified forms. That the ether is no vaporous or gaseous entity, and whether one calls it material or not depends solely on the definition of matter. And that the density of this cosmic stuff is enormous, and for this reason it is intangible and imperceptible, by instruments or by our senses.

In support of this last point, BSR writers have pointed out that the word DENSITY is used in four or five different senses by physicists, and any discussion of it without preliminary definition is useless.

We have maintained that etheric stuff of enormous density is responsive to the energic action of the human mind, that this applies to all objects and beings of the etheric worlds - including the Discs and other aeroforms. These things are thought-forms to begin with - projected as our own minds project our bodies. But certainly they are real products of vast scientific knowledge also. All things belong to science - but not to science which excludes metaphysics, philosophy and religion. . . And the life-story (so to speak) of a flying saucer is not to be discerned from its brief terrestrial appearance.

We could go through this book by Mr. Cramp and pick out literally scores of ideas, statements, inferences which have been and are part of our BSR approach, and were originally derived by us from information given by the Mark Probert Controls. For ten years these communicators have never varied from their fundamental statements, and we give them credit for high and honorable consistency - now that there are indications on every side that these viewpoints are indeed sound and thinkable in scientific terms. Because of the distrust of 'psychism' and 'metaphysics' this approach has been difficult and largely nullified - but this condition is now passing, and we congratulate our Associates on definite and enlightened progress. . . . . .

-(B.S.R.A. Item 29: "THE ETHER OF SPACE"(compiled by Meade Layne). (27 pgs)-Special price-$1.00.

(Corresp. of Assoc. A.V.A.): "I think the following will interest you. After the last atomic bomb experiment, the "fall-out" in northern Arizona was so heavy, and I mean HEAVY, that the indicators on the dash-boards of the automobiles here in the Valley went haywire and dashed around like mad. This lasted for three days and nights. The oil indicators, gas, and speedometer indicators did not register right, at all. They just jumped around crazily. And the news and radio reports told all people who were using geiger counters not to rely on them because they would not register correctly, and that was true. All the geiger counters acted like crazy. One would have thought the whole Valley was a uranium stock-pile. Well, I suppose it is interesting to be living in a poisoned world! Or should I say, 'I suppose it is interesting to wonder HOW LONG we can live in a poisoned world."

"MYSTERY DISC Is Baffling AEC Aides: (Central City, Colo., April 14, 1955 (UP) -- Atomic Energy Commission (AEC) officials here admitted today they were unable to identify a small but highly radioactive metal disc found in a gulch south of here.

The mysterious metal disc, measuring two inches in diameter and about a quarter-inch thick, also had baffled the FBI, U.S. Geological Service, state health officials and veteran mining men as to its origin or use.

A geiger counter reading of the strange "button" showed a high radioactivity.

Morris Steen, a mill-worker for Cherokee Uranium, Inc., found the disc. He said he spotted what he thought was a chunk of lead and pocketed it without further investigation. He said when he was removing the lead to make fishing weights yesterday, he discovered the mysterious disc inside. Officials said the lead apparently was a homemade shield for the object.

The disc has a small glass window on one side and a white, powdery substance which glows in the dark is visible inside the window." (Credit Assoc. James A. Diamond - 6227 Middlesex St., East Dearborn, Michigan).

"RADIATION HIKED HERE (from Cincinnati Times-Star): A recent A-bomb test in Nevada caused a notable increase in radioactivity here and at Columbus, Ohio. Experts say, however, that radiation levels are still not dangerous. Dr. A. Goldin, of the Taft Sanitary Engineering Center, reported radioactivity here increased by only 50 per cent. But an OSU source said the level at Columbus jumped 166 times above normal.

"OSU physicists said it is the highest count ever recorded at the university, where a continuous check is kept. The university experts attributed the increase t o fall-out from the large bomb test carried eastward by high altitude jet streams.

The OSU scientist said normal background count for the area is 30 a minute. Between 9:30 A.M. Saturday and 9:30 A.M. Sunday the figure increased to 5,000 a minute, the spokesman said.

He added that previous high was 750, registered a few weeks ago after a nuclear blast in Nevada. Dr. Goldin said a 24-hour watch is kept on radioactivity in the air over Cincinnati by a geiger counter hooked to a clock-dial. The instrument records radiation level at any given minute."-(cr. Assoc. L. Mann, Loveland, Ohio).

MEMO from Dr. George Hunt Williamson:)"At present I am again employed as Promotion Manager for NBC, at KYCA in Prescott, Arizona. We have had solid backing for the Telonic Research Center here, and have obtained a secluded mountain area of ten acres, where a laboratory will be built at once. We are constantly working with infra-red light beam communication, and will construct a Master Unit for <u>direct</u> interstellar communication (planet to planet). We hope to put out a bulletin(monthly) before too long... We have also ordered the finest electronic equipment, & several engineers from various parts of the country are joining us now, & others this summer. Many of our experiments would be of great interest to you. . ."

"DOUBLE POLIO CHALLENGE!" (We quote the following announcement received by BSRA Hdqrs., and also widely announced in other publications.)

"If the March of Dimes will accept the following challenges plus a public debate on "The Truth About Polio" and let the public know all the facts. . . Polio can be eradicated within 90 days.

"We submit this challenge to the National Foundation for Infantile Paralysis, Dr. Jonas Salk, and the United States Public Health Service.

"By agreement of all parties concerned, we will go into any designated hospital and take an unlimited number of acute polio patients, apply the Chiropractic methods of polio care we have been applying and welcome Life Magazine, Associated Press, United Press, Christian Science Monitor, and all reporters and commentators who desire to observe the results. WE WILL PROVE FOR THE BENEFIT OF ALL THAT THE CORRECTION FOR ACUTE POLIO HAS BEEN FOUND. Movies will be made of the cases handled that there may be no misunderstanding or denying the results. This is an open challenge made for the benefit of the American People and the Public Health."

"As an addition to this challenge we will:

Permit the nation to view the proceedings of the work via T.V. across the nation. We are ready to stand before the nation with our proof. Telecasts from the hospital wards every 6 hours that the entire nation may see for themselves. This would save thousands of lives! The most important news and interesting events are being brought to our nation via T.V. -- Why should American People be denied this TRUTH, and thousands die."

(notarized) (signed) Dr. Zenna H. Mills, D.C.
Dr. Samuel A. Mills, D.C., Ph.C.
- Burlington, Kansas.

"AN OPEN CHALLENGE. "To prove, to the 'skeptical' and the world in general that Polio is NOT caused by any LIVE VIRUS (or 'mysterious little bug'), but is merely a disease of malnutrition and a problem in body chemistry, I offer the following:

'I, Duon H. Miller, President of Polio Prevention, Inc., Coral Gables, Florida: hereby offer to personally serve as a 'human guinea-pig' by allowing blood from a new polio patient to be injected DIRECTLY into my bloodstream, or if t h e skeptics prefer they may administer this polio blood to me ORALLY.'

"According to Bacteriology, any disease caused by a (so-called) virus is capable of reproducing by injection, the same disease as that undergone by the body from which they are taken.

"WHAT BETTER PROOF CAN ANY MAN OFFER??

(notarized) Duon H. Miller (signed)
Coral Gables, Florida"

Concerning "Q-Energy film"-(from correspondence of Mrs. Ruth Reed). "Q-Energy film is produced by: Originality House, Inc., - 480 Avalon Ave., Akron 20, Ohio. --- (Descriptive material, and sample, from B.S.R.A. - $1.00.)

"We are so greatly interested in a case of cerebral palsy, in a beautiful little girl, now 4-1/2 years old. The father says they did not know her condition until she was 18 months old. We provided them with needed film to use in her treatment, and she has gained in weight and growth. This is most surprising since doctors claim no known cure has ever been found for this condition. Our keen interest has

(Concerning "Q-Energy film -cont'd)

been aroused in this case for several reasons: one is that many parents of handicapped children will do nothing to better the child's condition, since they, the parents, are in the lime-light, due to the handicapped child. But here is parental devotion and the will, trust and belief, that they can help the child even though doctors have discouraged them. The father says our interest and encouragement means very much to them, and we just KNOW they will overcome this handicap."

***** ***** ******

We are in receipt of a complimentary copy of the "AUSTRALIAN SAUCER RECORD", a 12-page brochure containing material which falls into sections under the following headings: A.F.S.R.S. Affairs; Letters To The Editor; Life On Mars; Some Recent Sightings, (6 or-7 items), etc. -- We congratulate the Australian Flying Saucer Research Society on this attractive magazine, printed by the Hyde Park Press, Ltd., Collins Street, Adelaide, and published by the A.F.S.R.S., at 22 Northcote St., Kilburn, South Australia. Price per copy-- 2 shillings-(40¢). Membership fee is 10 shillings ($2.00) per year.

- -

"Notes(from Associate Gilbert N. Holloway, D.D., Ph.D.,) On American Religions and Modern Evangelism": an 8-page brochure, 8½" x 11" --.50 -- Send inquiries & orders to: The Holloway School - Box 27866, Los Feliz Sta., Los Angeles 27, Calif.-

- -

B.S.R.A. is now offering the following material at new price reductions:

-- B.S.R.A. Item No. 18-- ROUND ROBIN -- three for $1.00 (current & back issue)
-- B.S.R.A. Item No. 28--"CLIPS,QUOTES, & COMMENTS"-- four for $1.00 (current and back issues).- (We can supply 20 back issues, at this price.) --
-- B.S.R.A. Item No. 29-- "ETHER OF SPACE": special:$1.00 (formerly $1.50) --
-- B.S.R.A. Item No. 40-- "THE STORY OF CREATION": special: $1.00 (was $1.50)--

NOTE: Ask for our(NEW)June 1, 1955 "PUBLICATION LIST; also our JUNE 1, 1955, "BOOK CLEARANCE LIST --

-- Regarding books: We again express our appreciation of the kindness of Associates who have donated used books to the B.S.R.A., the proceeds of which are used toward operating expenses.

Regarding mimeograph contributions: Donations toward the purchase of the mimeo equipment (plus proceeds from the book sales have now been sufficient to make us feel reasonably confident about carrying on with the ROUND ROBIN and other BSR publications. -- Many thanks for this help also.

- -

"SPIRITISM AND THE BEGINNINGS OF CHRISTIANITY - (by Jas. R.L. Morrell).-- published by:Morrell & Bahler, Morrell Bldg., Remington, Indiana. -An 87-pg booklet, pocket size. "An account of the deliberate and malicious destruction of a pure and ancient religion - and the true origins of the teachings attributed to the "historical" Jesus. The author has an admirable historical background and gives important information about Apollonius....The author of this booklet is in ill health and difficult circumstances; there are only a few copies left of his booklet and there will be NO reprint. No fixed price, but we recommend that Associates interested in the subject matter send $1.00, either to the author at address given above, or to BSR Hdqrs.

THE BORDERLAND SCIENCES RESEARCH ASSOCIATES

announce a second (improved) edition of

"THE COMING OF THE GUARDIANS"

An interpretation of the Phenomena of the Aeroforms ("Flying Saucers" - "Flying Discs") as Given from THE OTHER SIDE OF LIFE.

This book is a compilation of statements made at intervals over the last eight years by the Controls of the distinguished trance medium, Mark Probert. The table of contents reads as follows:

FOREWORD: Introductory Remarks -- The Etheric or "4-D" explanation of the Aeroforms -- Biographical Notes on the Communicators.

COMMUNICATIONS from the INNER CIRCLE -- Mediumship of MARK PROBERT.
Charles Lingford -- Thomas A. Edison -- Lao-Tse -- Lo Sun Yat-- Professor Alfred Luntz -- Ramond Natalli -- Arakashi --Rama-Ka-Lao- The Yada di Shi'Ite.

COMMUNICATIONS RECEIVED THROUGH ROLF TELANO

CHART OF THE ETHERIC ZONES OF TERRA

NOTES ON THE MARK PROBERT MEDIUMSHIP

Scores of publications of every description, thousands of news items and reports of sightings have appeared in print throughout the world, along with many fantastic guesses as to the nature of the phenomena. But apart from the statements of the Probert Controls, not a single worthwhile interpretation has been offered. And all subsequent data on this subject, since 1946, are explicable in terms of this interpretation. Surely this is a crucial test of any explanation - that it should apply to future happenings as well as to those of the past! The statements of the Controls have been elaborated, but never withdrawn or basically changed.

This incursion of the Aeroforms is a problem of vast scope, of racial and planetary importance. "THE COMING OF THE GUARDIANS" offers a basic interpretation in scientific and metaphysical terms, by minds of a high order speaking from another plane of existence. These communicators serve no special interests, or cult or creed.
And the B.S.R. operates as a public service. All funds received are turned back into costs of operation.

"THE COMING OF THE GUARDIANS" is a mimeographed book of about 65 pages (7 x 10"), neatly bound, compiled by Meade Layne., M.A., National Director.

Issued at B.S.R. Hdqrs. -- 3524 Adams Ave., San Diego 16, California. -Price $3.00.
--- Make checks payable to: Meade Layne ---

(A few copies of the first edition, @ $2.00
are still available.)
